! First load may take ~30 s — backend sleeps on Render free tier. App auto-retries until online.

2 Problem Statement & Solution

Atomberg’s goal-setting ran on fragile Excel sheets: no weight validation, no audit trail, no digital manager review cycle. AtomTracker is the structured, role-based digital replacement.

Goal Setting (100% Weight)
Up to 8 goals. Total weight enforced at 100%. Min/Max/Zero/Timeline UoMs with auto scoring.

Manager Approval Flow
Review, inline-edit target/weight, approve & lock, or return with a rework comment.

Quarterly Check-ins
Employees log Q1-Q4 actuals on locked sheets. Scores computed per UoM automatically.

Tamper-Evident Audit Trail
Every change logged with old/new value, timestamp, actor. Admin searches by UUID.

Cascaded Shared Goals
Admin pushes a goal to multiple employees. Copies sync actuals from the primary owner.

Org Analytics & CSV Export
Users by role, sheets by status, QoQ score trend, completion matrix, CSV export.

3 System Architecture

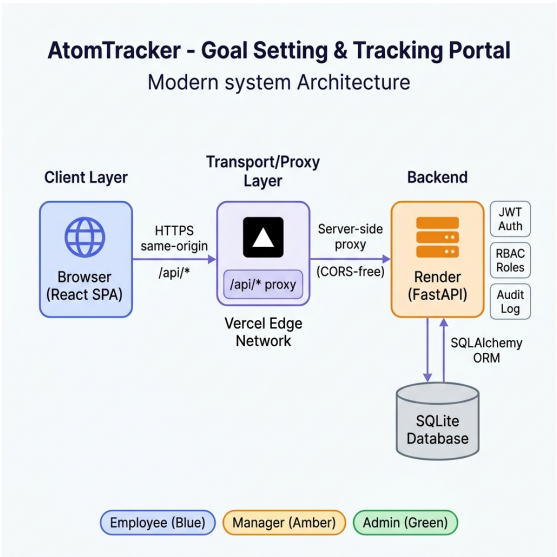

Figure 1 — Browser -> Vercel Proxy -> FastAPI (Render) -> SQLite

Component Breakdown

Component	Technology	Purpose
Frontend	React 19 + Vite + Tailwind v4	SPA on Vercel CDN
Proxy	Vercel /api/* rewrite	Server-side proxy — eliminates CORS

Backend	FastAPI + Uvicorn on Render	Stateless REST API
Database	SQLite via SQLAlchemy 2	Zero-config; Postgres-ready via env var
Auth	PyJWT HS256 + bcrypt	Signed 12-hr tokens, role enforced server-side

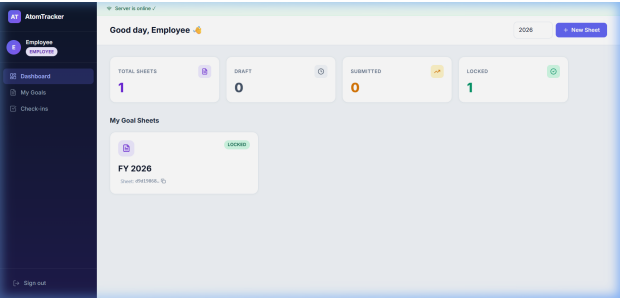

4 BRD Feature Coverage

Requirement	Status	Endpoint
Three roles (Employee / Manager / Admin) with RBAC	YES	auth.require_role
Up to 8 goals, min weight 10, total = 100	YES	POST /sheets/{id}/goals + /submit
Manager approves & locks the sheet	YES	POST /sheets/{id}/approve
Manager returns sheet with rework comment	YES	POST /sheets/{id}/reject
Manager inline edits target/weight pre-approval	YES	POST /goals/{id}/override
Quarterly check-ins with auto-scored UoMs	YES	POST /goals/{id}/checkins
Manager comments on a specific check-in	YES	POST /checkins/{id}/comment
Shared/cascaded goals (actuals sync from primary)	YES	POST /goals/{id}/cascade
Admin override of locked goals + audit trail	YES	POST /goals/{id}/override
Per-employee x quarter completion matrix	YES	GET /completion
Full audit trail (entity + system-wide)	YES	GET /audit-logs/{id}
CSV achievement report export	YES	GET /reports/achievements.csv
Org analytics (roles, status, QoQ trend)	YES	GET /analytics, /analytics/qoq

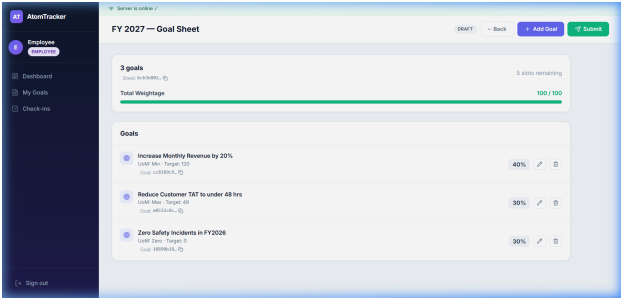

5 Live Demo Screenshots

All screenshots from: <https://atom-tracker-rust.vercel.app>

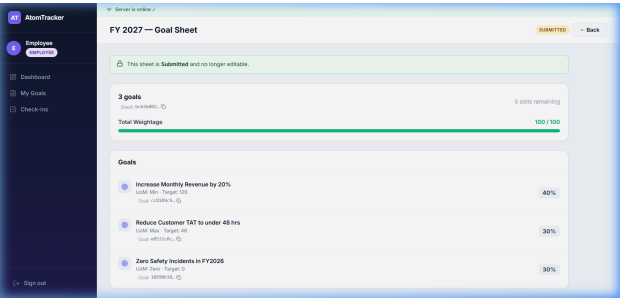

Employee Role

Employee Dashboard - KPI cards

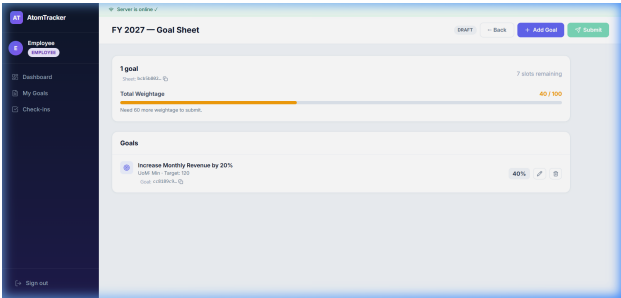

Goal Sheet - 3 goals, weight 100/100

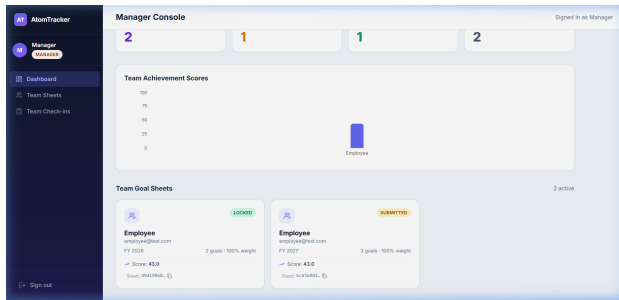

Sheet Submitted - awaiting manager

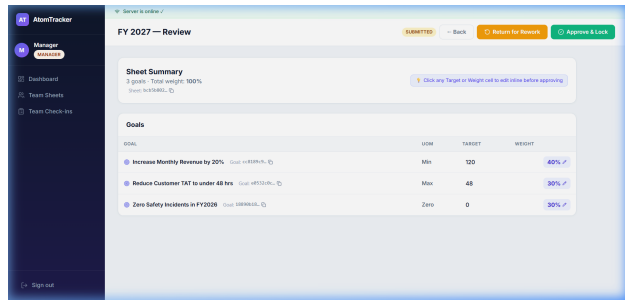

Manager Role

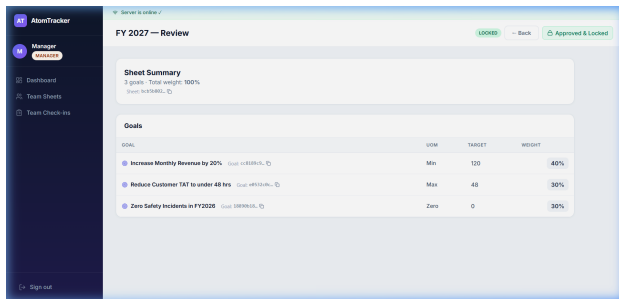

Adding a goal - form with live weight bar

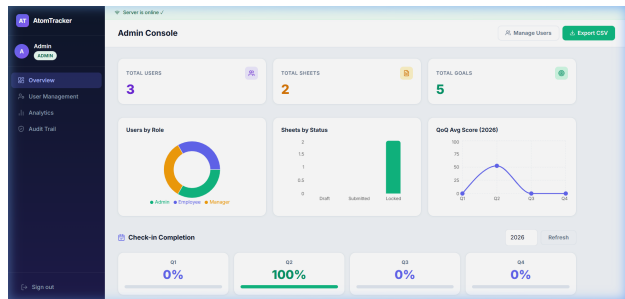

Manager Console - team sheets & scores

Review Page - inline-editable Target/Weight

Approved & Locked sheet

Admin Console - org analytics & charts

6 Tech Stack & Repository

Frontend

React 19 | Vite 8 | Tailwind CSS v4 | React Router v7 | Recharts | lucide-react | Vercel

Backend

FastAPI | SQLAlchemy 2 | SQLite | PyJWT (HS256) | bcrypt | Pydantic v2 | Uvicorn | Render

Repository Layout

atomtracker/

backend/ - FastAPI app, auth, models, routes, startup schema migrations

frontend/ - React SPA, Vite config, Vercel proxy rewrite (vercel.json)
